
Washing Without Work,

BY ELECTRICITY, IN YOUR STATIONARY WASHTUBS.

Save the big expense and the fuss and muss of a washwoman. Do away with the costly laundry, which washes your clothes in the same water that washes the clothes of others and uses chemicals which rot them. Wash, rinse and wring your clothes by electricity in your own clean, convenient, stationary washtubs.

The "Modern Home Washer" will do it. It fits in any stationary washtub and stores in the tub, out of the way, when not in use. It takes all the hard work out of washing. It solves the servant problem. It washes the clothes cleaner and whiter than any washwoman and much quicker than any other washing machine.

MODERN HOME WASHER

does a small washing in Six Minutes—a big one in less than an hour.

Most washing machines are bulky affairs that are always in the way in small kitchens. They mean a lot of work and sloppy floors, to fill and empty them. But the "Modern Home Washer," in your stationary washtubs, does away with all this bother and takes up no extra room. It uses less than two cents' worth of electricity an hour. It washes the daintiest things without injury as well as bath mats, blankets and small rugs. It makes the clothes last six times as long as those which are washed and soon worn threadbare on a washboard. Think what a saving that means.

This wonderful time labor and money saving machine has been approved by both Good Housekeeping and the Tribune Institutes. It is guaranteed for five years. It is made right in Brooklyn and arrangements for a free trial in your own home can be made. Write or telephone today. Ask for booklet.
