FOR SALE.

ABOUT 2000 acres of land on the East side of the Eastern Branch, and adjoining it, three miles from the city of Washington. Vessels drawing 12 feet water may load at the landing, where there is a tolerable good fishery.

Near 400 acres of this land is a rich bottom through which there are several streams of water, that turn a mill, erected on the land, and which might be used to advantage, in watering meadow: a part of the bottom is now in timothy grass and the whole is capable of producing grass in abundance, and tobacco. There may be between five and six hundred acres in wood, the rest is cleared land. A part of the land adjoins a commodious brick dwelling house, with all convenient outhouses; and a large and handsome garden, but not in good repair, on the borders of the town of Bladensburg.

This property, so convenient to the city of Washington, which affords a market for grass and all other productions of land, equal to any in the United States; so certain from its situation to rise in a few years, to a a price several times as high as will now be taken for it, well deserves the attention of men of fortune. The whole land including the dwelling house and improvements, and mill, will be sold for 10 pound per acre. It is questionable whether the meadow ground, alone, is not worth all the money; it is certain, that it might easily be made to pay more than the annual interest of the whole purchase.

LECTURES.

IN a science so various and complicated as the present system of the LAW, nothing which tends to facilitate the progress of the student can be deemed useless. It is with this view that the subscriber proposes to deliver during the winter, (and if suitable encouragement offers, annually)

A COURSE OF LECTURES,
On Education, Belles Letters, Composition, History and Law.

The subscriber means to divide the same into two distinct courses. The object of the division is, that young gentlemen who are designed to fill stations in active life, distinct from those of the learned professions, may resort to that course of lectures which will be delivered without a relation to the Law, which will be the sole foundation of the other.

If the plan should meet with success, the subscriber contemplates furnishing, next winter, a handsome Library, for the use of such gentlemen as feel desirous of patronising the undertaking.

The municipal laws of each state will then be provided—That students at law from any part of the United States will find it their interest to repair to the Metropolis, to pursue their studies; where they will have the advantage of attending the Congressional debates.

The facility of access which the houses of Congress offer, is a circumstance peculiarly advantageous to the student, and the youthful pleader, not only from the light which thrown in the course of debate on controverted questions of law; not only to be derived from witnessing the eager contests, the vigorous attacks, the wary methods of defence, exhibited by men of the most conspicuous talents, rivals alike in abilities and interest but especially from this consideration, that the speakers are, in general, exempted by the nature of their functions, from those defects to which pleaders are peculiarly exposed.

The Lectures will commence the first wee in December next, and continue until twelve distinct Lectures in each course shall have been delivered.

The terms may be known by application personally, or by letter post paid to
