PROPOSALS

FOR

PUBLISHING BY SUBSCRIPTION,

A New Work on the principles of Steam Engines to be entitled,

Young Steam Engineer's GUIDE.

By Oliver Evans.

TO CONTAIN

A General deſcription and inveſtigation of the principles of the engines uſed in England where the ſteam, is uſed as an agent to form a vacuum, and to act with a power only equal to the weight of the atmoſphere.

Alſo of the new and ſimple principle diſcovered by the author, of obtaining unlimited power, and working ſteam engines with a power equal to five or ten atmoſpheres, either againſt the preſſure of the atmoſphere in the moſt ſimple form, or with the uſe of a vacuum to take off that reſiſtance; and to ſhew why doubling the fuel on the new principle produces about ſixteen times the power and effect

Drawings of the ſimple and cheap, new form of engines ſuitable for producing and containing ſuch great power in the leaſt ſpace, and with the leaſt weight, to fit them for various purpoſes, for which no others would anſwer.

Tables of the ſize and proportions of engines of the different powers, from the power of one man to that of one hundred horſes, to ſuit different purpoſes; with the aſſiſtance of a profeſſional Engliſh ſteam engineer of long experience and great abilities, capable of communicating many ſecrets in the engineers art, that, will render the work highly uſeful, and which are not to be found in any other work

The author hopes to be able to ſhew, and demonſtrate principles (part of which he has already in uſe) by the application of which, he can make engines at half the price of thoſe heretofore uſed; not exceeding one fifth, or perhaps one tenth part of the weight to produce equal powers, and which will not require more than one third, or one fourth part of the fuel and which will ſerve the great purpoſes of raiſing water to water our cities, of ſawing ſhip timber, mahogany and marble ſtone, grinding malt, paints, chocolate, plaiſter and turning lathes, &c. in cities—ſawing timber on or near navigable waters; grinding grain, draining mines, working forges and furnaces, where water falls cannot be obtained—propelling boats againſt the ſtream, on all our rivers where hand oars are now uſed, and tranſporting heavy burdens on turnpike roads, with great advantages over the means by which theſe things have hitherto been done. He may alſo touch on ſeveral other mechanical and philoſophical ſubjects which may lead to uſeful diſcoveries.

CONDITIONS.

The work ſhall be printed on good paper and neatly bound. But as it will be original and the ſubject abſtruſe, and will be extended no farther than the author may be enabled to proceed in, no eſtimate can be made of the expence of the engravings, nor of the price of the book. He can only ſay that it will be delivered to ſubſcribers on the loweſt terms that can be afforded; and ſhould it exceed Four Dollars a copy, they ſhall be at liberty to refuſe the work.

A liſt of the ſubſcribers will be annexed.

Subſcribers for ſix copies ſhall receive the ſeventh gratis.

IN virtue of an order from the Orphan's court of Calvert county [ſtate of Maryland] I ſhall offer for ſale on a credit of ſix months on bond with approved ſecurity, at the late dwelling of Benjamin Ward late of ſaid county deceaſed. TO remove that diſtruſt often felt reſpecting new undertakings, and ſo prejudicial to manufacturing attempts in America, they think it proper to obſerve, that nothing is wanting in the buſineſs to enable good artiſts to perform their work here as well as in Europe. That they have theſe artiſts; that two of the partners were bred to the buſineſs in a factory of the beſt repute carried on by their father, long afterwards by themſelves. They truſt that while foreign goods are received without a queſtion, an unreaſonable ſuſpicion will not prevent their countrymen from giving that trial to their goods, which only can prove their value. Beſides a natural doubt, they know that certain intereſts, national as well as well as individual, will ſuggeſt objections to their undertaking. They have no difficulty in ſaying, that work of the like kind ſhall be as well executed here, as in other countries. The colors capable of being fixed, will be found as permanent; the cloths perhaps better ſubſtance, and the prices lower than of the imported cottons.

I DISCOVERED a few days ſince (in the Telegraphe) a challenge by Samuel Norwood, Eſq Bonaparte againſt Democrat—

At Annapolis this fall, I propoſed running Democrat againſt Bonaparte, carrying from 110 lbs to 140 at the diſcretion of Mr. Norwood; which was rejected. As Mr. Norwood refuſed the propoſition made by me at that time, I am not bound to run the race propoſed by him in the Telegraphe—Democrat will run Bonaparte over the Anapolis race courſe, on the third Tueſday in May next, four miles and repeat, for 1000 DOLLARS, play or pay, carrying 126lbs. each; which is the weight they are to carry by the rules of racing, both being ſeven years laſt ſpring—Should Mr. Norwood decline this offer, Democrat will cover mares next ſpring at the ſubſcribers farm, from the firſt day of March until the firſt day of Auguſt, at Sixteen dollars each and Fifty cents for the groom. Democrat's pedigree is equal to the pedigree of any horſe to be produced, having in him the blood of Medly, Eclipſe, Figure, Dove, Godolphin, Arabian, and Mr. Taſkin's Selima.

If this propoſition is approved of by Mr. Norwood, notice will be given in the Maryland Gazette within forty days from the date hereof.
