# DOOMED!

THE leather heel has outlived its usefulness—it is doomed. Well suited as it was to walking on dirt streets and sidewalks of a century or more ago, it is no better adapted to our present "concrete age" than the sandals of ancient days would be.

Run down, in many cases, within two or three weeks, your heels show the effects of the continuous impact of hard leather on unyielding city pavements.

Save your heels, save your shoes—above all save your nervous system. Don't pound away your health with every step you take. Wear heels of New Live Rubber; they absorb the jolts and jars that wear you out. They last twice as long as leather and hold your shoes in shape much longer.

When you buy your new shoes, buy them O'Sullivanized. Up-to-date shoe dealers now sell latest style shoes with O'Sullivan's Heels already attached.

Insist on O'Sullivanized shoes—the new live rubber heels give the greatest wear with the greatest resiliency.

In black, white or tan; for men, women and children; 50c attached.
